1. Who We Are

Our Foundational Story

Alameen organization is a non-governmental non-profit humanitarian organization established in 2012 as a volunteer community initiative by several doctors and academics supporting the late martyr Mohammad Ameen Harsouny, in response to the needs of those affected by the Syrian humanitarian crises and in commemoration of his memory.

Our Mission

Supporting and enhancing healthcare and the well-being of people in need and communities affected by crisis through sustaining healthcare systems, education, and community programs.

Our Vision

Wellbeing for all humanity

Our Values

- **Trustworthy:** we have confidence in our colleagues, beneficiaries, and partners. We build, maintain, and strengthen trust through time to allow us and others to feel safe and comfortable.
- **Responsive:** We are answerable and liable to our colleagues, partners, and the people we serve.
- **Accountable:** we have the moral duty and responsibility to use our resources efficiently.
- **Integrity:** we abide by our principles and values; we are honest in our daily work and services provided.
- **Transparency:** we share information internally and externally to develop trust and respect. We openly communicate relevant information with concerned parties.

Our Principles

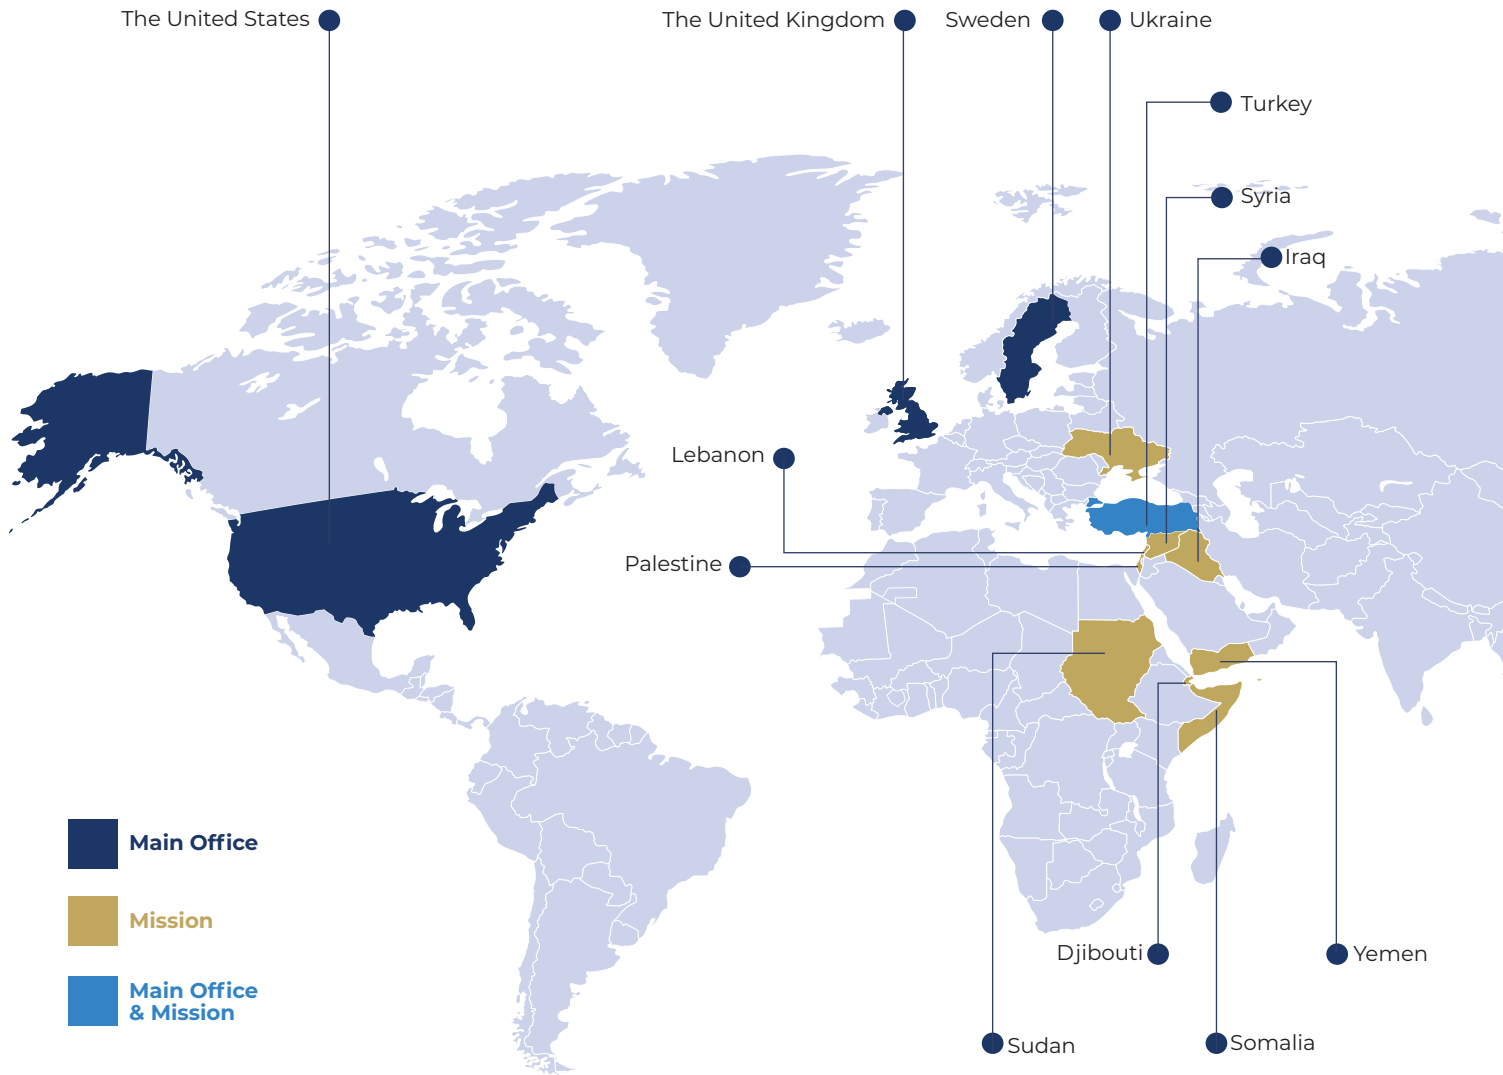

Alamen support all humanitarian principles agreed by the global community:

- **Humanity**
- **Neutrality**
- **Impartiality**
- **Independence**

2. Where We Work

Alameen Officially licensed in many countries such as The United Kingdom, Sweden, The United States, and Turkey. These main offices are officially registered with a charity status facilitating the advocacy activities, fundraising opportunities, and spreading our cause loudly everywhere we can.

Alameen has been also involved in humanitarian responses as operational missions in Turkey, Syria, Lebanon, Yemen, Somalia, Palestine, Sudan, Iraq, Ukraine, and Djibouti over the past years. In these mission offices, Alameen coordination teams operating coordination and collaboration with local authorities, providing services through three main Humanitarian programs: Health and Nutrition, Protection and Education, and Emergency Response.

3. Our Sustainability Contributions

Alameen's goals align with the United Nations' Sustainable Development Goals for 2030, focusing on providing services based on global standards and protocols tailored to the contexts of local communities. All services, projects, and working modules are designed and operated to be compatible with specific goals agreed upon for sustainable development. Mainly the following goals:

4. Data and Need Assessment Efforts

Service delivery models are diverse, tailored to the needs of local communities, and ensure full coordination and collaboration with all stakeholders. These needs are professionally assessed using both primary and secondary data, following a thorough reporting process that spans from data collection to analysis. Alameen boasts a specialized Data and Needs Assessment Unit (DNA), responsible for producing detailed periodic reports.

The Data and Need Assessment Unit (DNA) is committed to providing information and research-backed support. Alameen has been able to Develop a multitude of comprehensive needs assessments and scenario reports on different areas in countries we have access to, providing background information to aid in better coordination with valuable research. in addition to developing programs and enhancing the effects of project implementation.

The DNA unit's responsibilities are:

Comprehensive Reports

Consultancy

Evaluation

5. Alameen Programs & Services Modules

Alameen operates primarily through three programs, aligned with the UNOCHA's clusters and coordination structure.

Each program contains many intervention modules. For the health and nutrition program, Alameen provides lifesaving and relief health services through fixed or mobile primary care centers, hospitals, specialized centers, such as dialysis centers, disabilities rehabilitation centers, blood banks, and so on. In addition to coordinating with health stakeholders in providing immunization, nutrition, referral, and networking.

In the education and protection program, Alameen provides services through fully or partially supporting specialized centers or support activities outdoor through mobile clinics for camps or communities.

For any other relief aid, Alameen works under the umbrella of the emergency response program to provide food or sanitation baskets, non-food items, shelter requirements, water and sanitation buckets, or any other services according to the needs.

5.2. Education & Protection Program

5.2.1. Education

Alameen implements several educational projects to raise the quality of Education and increase safe access to education for children and support teachers and administrative staff alike.

The services provided include operation costs, capacity building, and raising awareness for both teachers and students in addition to rehabilitation of educational infrastructure.

5.2.2. Protection

Alameen provides services related to child protection, gender-based violence, family tracing, mine action awareness, women empowerment, and psycho-social support. Our specialized staff provides Psycho-social support services in 10 different facilities.

Alameen also provides mental health services through specialized MHPSS centers, mobile clinics, or integrated clinics within other health facilities.

All services provided are following the trusted international guidelines and protocols that agreed with the protection stakeholders in the coordination bodies.

Emergency Response

5.3. Emergency Response Program

Alameen's operations are committed to addressing humanitarian emergencies and responding promptly to crises from natural disasters or conflicts.

Our services are tailored to meet specific needs, encompassing shelter, WASH (Water, Sanitation, and Hygiene), non-food items, and food baskets.

5.3.1. Epidemics:

Alameen responded to the COVID-19 epidemic and cholera endemic by providing vaccination services and hygiene kits to local communities in the areas working in.

We also provided raising awareness activities and medications for Malaria, Dengue fever, and leishmaniasis.

5.3.2. Natural Catastrophes

Alameen responded to natural catastrophes like floods and snowstorms which negatively impacted the local communities. Through Health, NFI and FSL services.

Recently, Alameen responded to the catastrophic Turkey-Syria earthquake, which inflicted widespread damage across communities. We responded through Health, NFI, FSL, and WASH activities in both Turkey and Syria.

We currently manage 20 mobile clinics and provide support to 40 health facilities by supplying medications and consumables and facilitating medical assistance to +218,000 patients.
